

ALEX JOHNSON

Python Developer

+1 (415) 555-0192 • alex.johnson.dev@gmail.com • San Francisco, CA, USA

Summary

Computer Science graduate specializing in Python development, data engineering, and automation. Proficient in SQL, Docker, Streamlit, Git, and ETL pipeline design. Experienced in building end-to-end analytics platforms and AI-powered tools. Seeking a software engineering or data engineering role to deliver scalable, production-ready Python applications.

Profiles & Portfolio

Education

State University of Technology

B.S. — Computer Science

San Francisco, California

08/2020 - 05/2024

Certifications

[Google Data Analytics Professional Certificate](#) — Coursera (2024)

[AWS Cloud Practitioner Essentials](#) — Amazon Web Services (2023)

Work Experience

Python Developer Intern

06/2023 - 12/2023

[DataBridge Solutions, San Francisco, CA](#)

- Developed Python automation scripts to streamline internal data reporting workflows, reducing manual processing time by ~65%
- Built and maintained ETL pipelines using Pandas and SQL to ingest, clean, and transform 50K+ records from multiple data sources into a centralized SQLite database
- Collaborated with a team of 4 engineers using Git and GitHub; maintained structured commit history and reviewed pull requests across 3 feature branches

Junior Data Analyst (Part-time)

01/2024 - 05/2024

[Nexora Analytics, Remote](#)

- Wrote advanced SQL queries (GROUP BY, JOINS, window functions) to generate weekly revenue and KPI reports for 3 business clients
- Deployed an interactive Streamlit dashboard for client data visualization, replacing a static Excel reporting process used by 10+ stakeholders

Accomplishments

Hackathon Finalist — HackSF 2023

Finalist in a regional 48-hour hackathon; built a real-time data pipeline prototype with a team of 4, placing in the top 5 out of 30 teams

Open Source Contributor

Contributed bug fixes and documentation improvements to 2 open-source Python data tooling repositories on GitHub

Projects

Sales Dashboard

github.com/alexjohnson-dev/sales-dashboard

End-to-end Python sales analytics platform with ETL pipeline, SQL analytics, and interactive Streamlit dashboard for business KPI reporting.

- Built a full ETL pipeline ingesting CSV sales data into SQLite, executing advanced SQL analytics, and auto-generating JSON and text business reports
- Developed an interactive Streamlit dashboard with KPI cards, sidebar filters, and Matplotlib visualizations; containerized with Docker for portable deployment

Resume Analyzer

github.com/alexjohnson-dev/resume-analyzer

AI-inspired ATS resume analyzer that parses PDF resumes, extracts skills, and scores compatibility against job descriptions via a Streamlit interface.

- Built a PDF parsing and NLP-style keyword extraction engine using PyPDF2 and Python to identify matched and missing skills between resume and job description
- Designed a modular 4-module architecture (parser, skills, scorer, app) with a Streamlit dashboard showing ATS score, skill gaps, and analytics in real time

Skills

Python · SQL · SQLite · Pandas · Streamlit · Matplotlib · Docker · Git · GitHub · REST APIs · JSON · ETL Pipelines · Data Visualization · PyPDF2 · NLP Keyword Extraction · OOP · Linux · Logging · Configuration Management
